

Sinusoid

version 2.8

1

Sinusoid

Sinusoid is an 8 bit music tracker/sequencer sound toy for iOS. It has four channels, 2 sine, 1 square and 1 drum channel. Sound controls are attack, decay and tremolo. Other features are copy, paste, save and load. Sinusoid is inspired by retro games and old almost forgotten trackers...

Core MIDI

Core midi can also be used to control sinusoid, where the camera connection kit can be used or wifi.

Export (.aiff)

Exported files can be shared through email, uploaded to soundcloud or by MAPI audio copy. The export is also copied to the humbletune pasteboard, for importing into shapesynth.
